PRODUCTS GUIDE

Smart Implant Solutions

WE ARE SPECIALIZED IN THE MANUFACTURE AND DISTRIBUTION OF DENTAL ABUTMENTS

Smart Implant Solutions was born as the result of the love of our profession. We offer new solutions, ready for digital future, to meet the market's needs for compatible implant abutments.

A great team of professionals works daily to find solutions to your needs. We collaborate with dental experts (dentists, dental technicians,...) that help us to design the best abutments and to be up-to-date with market trends.

We dedicate ourselves to innovate with seriousness and passion.

Recently, Smart Implant Solutions has expanded its facilities, moving the manufacturing plant to Etxebarria town and maintaining its headquarters in Technology Park of Gipuzkoa, San Sebastian (Spain). This park belongs to the network of technological park of the Basque Country, where only companies, technological centers, research units of universities and research centers of high technological component are located.

SMART QUALITY

FOR SMART IMPLANT SOLUTIONS QUALITY COMES FIRST

We have all the certificates that guarantee our products.

- **LICENSE OF MANUFACTURER OF SANITARY PRODUCT.** The Spanish Agency of Medicines and Medical Devices.
- **ISO 13485.** Guarantee of Quality Management in the Manufacture of Medical Devices.
- **CE MARK** mark in products.

TESTS

MECHANICAL TESTS PERFORMED ACCORDING TO UNE-EN ISO 1480

Smart Implant Solutions products go through our test bench where we perform mechanical tests according to UNE-EN ISO 1480.

In these tests we verify:

- **TORSION:** To determine the maximum torque that the internal screw supports.
- **COMPRESSION:** To determine the maximum force supported by the assembly.
- **FATIGUE:** To determine the maximum force at which the set has infinite life (5 million cycles).

“We have so much confidence in our products that our logo is the symbol of infinity, the period of warranty we offer”.

QUALITY GUARANTEE

At Smart Implant Solutions, we manufacture our products using high-strength Titanium Ti-6Al-4V ELI, which, while belonging to the same range of medical-grade titaniums, ranks at the highest level of strength and reliability. For this reason, our abutments are made from the finest titanium available in the dental implantology market.

With more than 12 years of experience manufacturing components for implant rehabilitation, our close, day-to-day relationship with clients and our firsthand understanding of their needs drive us to keep growing and evolving. This commitment keeps us at the forefront of solutions, innovation, and product development that builds confidence and delivers results. **When others follow your steps, it means you are doing things right.**

SMART LIBRARIES

HOW TO DOWNLOAD IMPLANT LIBRARIES

LIBRARIES ▾

- Exocad
- 3shape
- Dentalwings
- Blender for dental
- Old libraries

STEP 1

1. From a computer, connect to: **www.smartimplantsolutions.com**
2. On the main menu, **LIBRARIES**, click on button **Exocad**.

Private area Exocad Smart Ti-Bases libraries

To access the Exocad Libraries for Smart Ti-Bases area, you must enter the following data.

Name*

Company*

Country*

E-mail*

☒ I accept the Privacy Policy

Send

STEP 2

To access the Exocad Smart - Ti-Bases Libraries area, please fill in and submit the form. Once this has been filled in and sent, just wait for some seconds to be automatically redirected to the libraries area "Exocad".

STEP 3

1. Click on the Smart Ti-bases button.
2. Click on the button of the library to download.
3. Press the Download button. The file will be downloaded to the Downloads folder on your PC.
4. Download progress display in the Google Chrome browser.

Smart Ti-Bases > Astra® Tech Osseospeed®

Astra® Tech Osseospeed®

SIS-0500_AS_TI_BASE

Size: 125.03 MB
Date added: 16-04-2025

Download

STEP 4 UNZIP THE FILE .ZIP

1. Go to the Downloads folder on your PC.
2. Unzip the downloaded file.

To unzip the file you can use a standard zip file decompression program downloaded from the internet such as WinZip or WinRAR.

SCANBODY Ti LIBRARIES

SCANBODY Ti

Libraries for Ti-Base, CrCo base (overcastable) and digital analog, from intraoral or desktop scanning.

SCANBODY D (Implant Level)

Libraries for titanium scanbodies. They are used for implant direct work over digital analog, from intraoral or desktop scanning.

exocad

Free for:

- Ti-Bases.
- Cr-Co bases (overcastable).
- Digital analogs.
- Direct to implant.

3shape

Free for:

- Ti-Bases.
- Cr-Co bases (overcastable).
- Digital analogs.

dental wings

Free for:

- Ti-Bases.
- Cr-Co bases (overcastable).
- Digital analogs.

blenderfordental

Free for:

- Ti-Bases.
- Cr-Co bases (overcastable).
- Digital analogs.

For other options for 3shape and dentalwings, please send an email to the email address:
info@smartimplantsolutions.com

LIBRARY FILE GUIDE FOR INSTALLATION

If you need more help for installing the libraries, installation guides in PDF are available in "LIBRARIES" web section.

INTRA/EXTRA-ORAL SCANBODY

A SINGLE SCANBODY FOR ALL USES

The line of Scanbodies developed by Smart Implant Solutions R&D department greatly simplifies the way of working. It serves both for intraoral scanning (clinical) and for use in cast or resin models (laboratory).

SIMPLIFIES THE WAY OF WORKING

DUAL USE ANALOG

TRADITIONAL AND DIGITAL

The new analog developed by the Smart Implant Solutions R&D department reproduces the implant system connection with a unique precision.

- Dual use, ready to work in traditional and digital mode.
- High precision machining.
- Reduced length, (print material savings).
- Perfect fit to the printed model.
- Reusable.
- With a printing pattern to adjust the printer in an exact way.

THE DUAL-USE, REPRODUCES THE IMPLANT
SYSTEM CONNECTION WITH A UNIQUE PRECISION

***OPTIMAL FIT**

(*) OPTIMAL FIT: Optimal fit with Smart Implant Solutions Multi-Unit wrenches (contra-angle, ratchet, manual...). The M1.4 thread is specially reinforced to ensure a firm screwing joint more resistant to the applied torque.

All angled abutments are
delivered assembled with
their corresponding Screw
and conveyor.

MULTI-UNIT SIS

TRANSEPITHELIAL ABUTMENT CREATED BY SMART IMPLANT SOLUTIONS TO AVOID PERI-IMPLANTITIS

THESE ARE FOUR OF ITS MULTIPLE CHARACTERISTICS:

1. IT PROTECTS THE IMPLANT FROM BACTERIA.

The change of platform or platform switching. This means that the prosthetic or Multi-Unit abutment must be narrower to the implant in the connecting zone to grant the support of the collagen fibres in the step that would form and protect the implant from the passage of bacteria with consequent bone loss.

2. IT PREVENTS GRAYS ON THE GUM.

The abutment or Multi-Unit surface that connects to the dental implant must be anodized, which makes bacterial colonization more difficult and improves the appearance of the soft tissue, and prevents gray matter in the gingiva, which worsens dental aesthetics.

3. IT IMPROVES THE CONNECTIVE TISSUE DENSITY.

As a second point, having microretentions at the base of the abutment or Multi-Unit favors collagen brackets to get anchored to it and therefore improves connective tissue density.

4. IT FACILITATES COLLAGEN FIBERS FORMATION AROUND THE IMPLANT.

The prosthetic or Multi-Unit abutment must be convergent from the implant to the support of the dental prosthesis. This promotes the formation of circular collagen fibres around the dental implant as opposed to when the abutment is straight or divergent, in this case the collagen fibres are arranged parallel to the implant. The existence of circular collagen fibres around the implant protect the dental implant making much complicated the colonization by bacteria and therefore the periimplantitis.

MULTI-UNIT mini

NEW TRANSEPITHELIAL ABUTMENT DESIGNED FOR THE FIGHT AGAINST PERI-IMPLANTITIS THANKS TO THE IMPROVEMENT OF THE SUPRACRESTAL BIOLOGICAL SPACE

Smart Implant Solutions together with Dr. Antonio Romero and Dr. Macarena Romero, carried out a clinical study based on multiple authors such as Linkevisius, Michelli, Blanco, etc. They concluded that the characteristics of the transepithelial abutment are essential for the stability of the peri-implant bone and the success of implant treatment. As a result, the new MULTI-UNIT mini abutment has been developed to obtain these goals in the implant treatment.

SIScator

SMART IMPLANT SOLUTIONS HAS CREATED THE SIScator ABUTMENT AND THE SIScator ANGLED 15°

FEATURES – SIScator Angled Abutment 15°

- **Available heights:** 1.5 mm and 3 mm.
 - **Optimized gingival area:** anatomical design that prevents excessive thickness and sharp edges, promoting natural soft-tissue adaptation.
 - **Exact mesial-distal height:** millimetric dimensional control that ensures uniformity and precision once seated.
 - **Carrier:** prevents marks or wear on the abutment during handling.
 - **Paralleling function:** the carrier allows verification of the abutment's correct verticality during intraoral placement.
 - **Micrometric connection:** perfect fit between implant and abutment, ensuring optimal stability and sealing.
 - **Compatibility:** works with standard SIScator female abutments (straight and divergent).
 - **Compatible screws:** suitable for original connections (same screwdriver and seating).
 - **Ergonomic and functional design:** developed to optimize chairside time, improve precision, and offer a superior user experience.
-
- **Abutment, screw, and carrier** supplied together for increased safety and convenience in the clinic.

It is recommended for use with our range of compatible products for SIScator.

BIOCARB^B

BIOCOMPATIBLE SURFACE COATING

Treatment with tungsten carbide that gives it the same properties as gold in terms of pretension and resistance to fatigue.

A CROWN FOR A LIFETIME.

When the crown begins to move and release from the implant, slowly but continuously, a new operation involving certain risks must be carried out. With BIOCARB you can feel sure, the torque on the screw is reduced and at the same time the coated implant screws have a 30% better tightening torque.

- Multi-layer amorphous carbon coating.
- High tenacity and hardness (2000-5000HV).
- Finished gray.
- Totally heme and biocompatible when based on carbon.
- Sterilizable.
- High wear resistance.
- Better adjustment of the screw.
- Reduction of the torque applied on the screw.
- The implant screws can be removed without risk of breakage or seizure.

BIOGOLD^B

BIOCOMPATIBLE SURFACE COATING

Offers a number of advantages, such as its high resistance to corrosion during sterilization and an aesthetic golden yellow color.

MAXIMUM HYGIENE AND SAFETY.

Our Ti-Bases, MultiUnit abutments, SISector abutments, straight and angled abutments are treated with the BIOGOLD coating, to improve the performance. This treatment offers a better resistance to fatigue, prevents the ion leaching and reduces bacterial activity preventing the stick of organic waste.

GUARANTEES AND CERTIFICATIONS:

INSTRUMENTS

FOR IMPLANTOLOGY

THINK DIGITAL

SMART IMPLANT SOLUTIONS OFFERS A WIDE RANGE OF ACCESSORIES:

- Kits which consist of short (clinical) or long (laboratory) handle and different tips to choose.
- Special keys for Locator®/SIScator and Multi-Unit, racks, handles, adapters, etc.
- Tips for drivers with multiple heads in short size (20 mm), medium size (25 mm) or long size (35mm).

	Short handle screwdriver Kit (clinic) It has 6 tips to choose and includes the short handle.	SIS-9114S
	Long handle screwdriver Kit (laboratory) It has 6 tips to choose and includes the long handle.	SIS-9115S
	Torque Ratchet kit It consists of a torque ratchet, 6 inserts to choose and includes the short handle.	SIS-9116S

EXTRACTOR OF IMPLANTS AND SCREWS

SPECIFIC USES OF EACH TYPE OF EXTRACTOR

EXTRACTOR FOR CROWNED OR DEFORMED SCREWS:

EXTRACTOR TYPE 1

- Designed to extract screws with crowned or deformed connection.
- Universal for hexagonals of 1.20, 1.25, 1.27, 1.30, unigrip, Torx, etc.
- Suitable for screws, pillars of healing, etc.

EXTRACTOR TYPE 2

- Designed to extract screws with the connection completely impaired.
- Used when the extractor type 1 does not hold or drag the affected area.

CROWNED SCREW: The one that maintains its head but the connection for the key is partially or totally damaged.

EXTRACTOR FOR FAILED IMPLANTS:

EXTRACTOR TYPE 3

- Designed to remove failed implants threaded M1.6.
- Universal for most of failed implants from the market. It should not exceed more than 100 N cm torque.
- For higher torques use extractor 4.

EXTRACTOR TYPE 4

- Designed to remove implants threaded M1.8 y M2. Universal for most of implants from the market.
- It is advisable to not exceed more than 200 N cm torque.
- Can also be used for implants M1.6 thread if previously the extractor type 3 has been used.

FAILED IMPLANTS: it is the one that, for reasons like infection, little bone, poor hygiene, incorrect prosthesis... does not reach a correct osteointegration and has abnormal movement. Its extraction will be with very little torque, never superior to the technical indications, in an easy and comfortable way.

INSTRUCTIONS FOR USE

CUSTOM MADE ABUTMENTS

DO YOU NEED ANY SPECIAL ABUTMENT?

Call us and we will listen to you.

We will pass you a budget without any obligation, and if you are interested we will pass your need to our R & D department, where they will develop for you the abutment you need.

WE ARE ABLE TO
MANUFACTURE ANY CONNECTION

HOW TO PLACE YOUR ORDER

sales@smartimplantsolutions.com

CONTACT US

- By email: sending an email to sales@smartimplantsolutions.com.
To avoid misunderstandings, please do not forget to indicate the product reference number.
- By web: www.smartimplantsolutions.com

TRANSPORT

- Check contacting our office the transport conditions.

RETURN OF PRODUCTS

- Returns are accepted up to 30 days from shipment date of the order.
- To accept the return of the product, you have to comply will following premises:
 1. A copy of the invoice must be attached.
 2. Product must not be opened and in good conditions.
 3. Transportation costs will be at customer's charge.
